1.0 Introduction

Accurate and proper Preventative Maintenance is crucial to maximizing machine life.

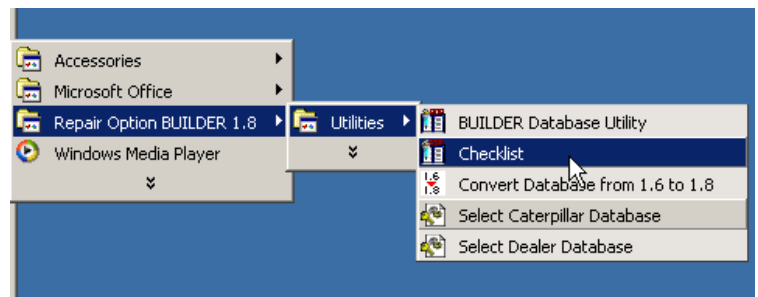

Currently, there is no way to generate a Preventative Maintenance (PM) checklist from the PM Checklist Website that displays each PM task, along with the associated parts list for each PM task, displayed together within the same document. Using the BUILDER Checklist Utility, a PM Checklist that shows the parts needed for each task can be generated.

The most efficient and comprehensive checklist is available in the BUILDER Checklist Utility using available CGM BUILDER files posted to CatMiner since 1/01/2006 (and all future CGM BUILDER files) or the dealer's own localized versions of these files. These files use a 'Job Operation' PM structure, which is necessary for the PM Checklist Utility to function.

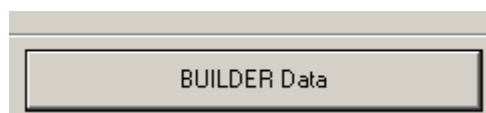

Note: PM Checklists for Mining equipment posted to the CatMiner 'BUILDER Downloads' webpage prior to 1/1/06 can be downloaded from the CatMiner 'Legacy PM Checklist' webpage at <https://catminer.cat.com/cda/layout?m=117964&x=7>

2.0 Best Practice Description

Have the desired BUILDER file in your BUILDER application. From the start menu, access the Checklist.

Select 'BUILDER Data' from the lower right hand corner. Highlight the desired BUILDER file and choose 'Copy'.

3.0 Implementation Steps

- To obtain a subscription of BUILDER 1.8 software, contact:

Kathryn T Flores
Dealer Distribution Systems
Systems & Processes Division
Flores_Kathryn_T@cat.com

- For access to the CGM BUILDER Downloads webpage in order to view and download posted CGM BUILDER files, contact:

Bill Gallagher
Global Mining Division
Product Support
Gallagher_William_L@Cat.com

4.0 Benefits

- Dealers that currently use their own localized CGM BUILDER files can generate a PM checklist that reflects any changes they have made to the PM Repair Options within their BUILDER files.
- Elimination of the need for a dealer to make these same changes to a PM checklist downloaded from the PM Checklist Website.
- Both PM tasks and associated parts lists are displayed together within the same document. This provides a simpler, clearer format to follow for conducting PM routines.

THE INFORMATION HEREIN IS THE PROPERTY OF CATERPILLAR INC. AND/OR ITS SUBSIDIARIES. WITHOUT WRITTEN PERMISSION, ANY COPYING, TRANSMITTAL TO OTHERS, AND ANY USE EXCEPT THAT FOR WHICH IT IS LOANED, IS PROHIBITED.

Using BUILDER to Generate the Most Comprehensive
PM Checklist

DATE
