1.0 Introduction

This Best Practice will describe the steps taken by Marcosa to recruit, train and develop residents from the community in the operation of mining equipment, with social responsibility to meet the customer's needs. The goal of this training process is the local development and qualification of manpower.

2.0 Best Practice Description

Marcosa, in partnership with the customer and municipalities near the mine site region, created a project to recruit people from the local communities and train them in mining equipment operation, directed to the CAT fleet. The project was called *Operators Training School*. Over five hundred candidates participated in the selection process, competing for forty vacancies. The process consists of the following steps:

- Curriculum analysis
- Theoretical evaluations
- Practice on CAT simulators
- Psychological test
- Clinical evaluation

The candidates must have a valid driver's license to participate; previous experience in operation is not required.

During the process, the instructors from Marcosa evaluate the candidates with the greatest ability for equipment operation. The training program lasts one year, and the apprentices are constantly monitored to identify and close skill gaps. After the training program, the operators who have successfully accomplished the requirements are certified by Marcosa and are able to operate equipment such as: OHTs, Track Type Tractors, Wheel Loaders and Motor Graders. Once certified, they will be hired by the customer.

Responsibilities:**Dealer:**

- Provide theoretical and practical training for the participants
- Strictly comply with the legislation in force
- Send monthly reports with detailed information regarding the performed activities, performance of the participants, strategy and recommendations to the customer
- Provide qualified instructor(s), one human analyst and other necessary manpower to lead the training and activities regarding the *Operators Training School*
- Participate in monthly meetings with the customer to discuss the results and present the monthly report
- Provide simulators for the selection process and training

Customer:

- Provide a safety technician for the monitoring of the activities on the jobsite
- Provide meal, transportation, uniform and PPE's during the training program
- Pay the participants monthly scholarship assistance
- Create a commitment and conduct term for the training period
- Perform the selection process with the support of the Dealer
- Provide the necessary equipment for the practical training
- Provide access authorization to mine for the participants during the practical training, according to internal procedure
- Supervise and evaluate the quality of the training
- Monitor the development of the program, suggest improvements and give recommendations
- Provide an employee to assist the instructor full time, during the period of practical training
- Compensate the Dealer with the costs derived from the Operators School
- Provide transportation for the participants on the jobsite during the period of practical training
- Provide one diesel vehicle 4x4 for the Dealer's instructor

Municipalities:

- Provide one adequate room for the execution of the in classroom and simulators training in their jurisdiction; (the room shall be equipped with electricity, water, coffee, air conditioner, tables and chairs in sufficient quantity, for the perfect development of the activities)
- Provide adequate sanitary facilities (male and female)
- Ensure proper lighting and comfort to all people involved
- Publicize the program in their jurisdiction

3.0 Implementation Steps

- Set up a meeting with the customer and municipalities to discuss the scope of the project
- Define responsibilities
- Define number of participants and duration of the program
- Elaborate the training schedule
- Define the selection process and criteria
- Publicize the program (Operators School) Media outlets: outdoors, local radio and newspaper, t-shirts, etc
- Execute the selection process
- Begin the training program
- Evaluate and certify the participants

4.0 Benefits

- **For the Customer:**
 - ✓ Increased operational safety
 - ✓ Costs reduction with training and facilities
 - ✓ Increased productivity
 - ✓ Better inspection quality by the operators
 - ✓ Establishment of a new mining culture: Maximum zeal for the equipment and operational excellence of the mining equipment
 - ✓ Operator turnover reduction
 - ✓ Additional dealer support and strengthening of the partnership between dealer and customer;
 - ✓ Specific training schedule according to the customer's needs
 - ✓ Individual follow up
 - ✓ Greater sense of responsibility by the operators
 - ✓ Greater development of the manpower
 - ✓ Introduction of new practices, skills and knowledge
 - ✓ Accelerate the implementation of operational improvements
 - ✓ Commitment to social responsibility
 - ✓ Utilization of local talents
- **For the Community:**
 - ✓ Greater professional development and recognition
 - ✓ Greater incentive for self development
 - ✓ Increased investments in the region
 - ✓ Encouraging to professionalism
 - ✓ Increase of the employment rate

--	-------------------	-----------------	--------------------------

- **For the Dealer:**

- ✓ Greater profitability of the business of their customer
- ✓ Greater synergy with the customer
- ✓ Be recognized by the customer as a solution provider
- ✓ Dissemination of the CAT Best Practices
- ✓ Improvements in the operation of the customer's mining equipment
- ✓ Costs reduction with facilities
- ✓ Additional dealer support and strengthening of the partnership between dealer and customer
- ✓ Fixed monthly payment for the training services
- ✓ New business opportunities

5.0 Resources Required

- **Human:**

- One safety Technician
- One human resources analyst
- Two operational instructors focused on the program (Suggestion: one Instructor for every 20 participants)
- One employee to assist the instructor

- **Features:**

- Study material (Caterpillar literature)
- PPE's and uniforms
- Facilities (classrooms, toilets, etc.)
- Auxiliary material (Notebook, Exercise books, projector, etc.)
- Simulators (OHT, Wheel loader, Motor grader, Track type tractor)
- Media outlets
