1.0 Introduction

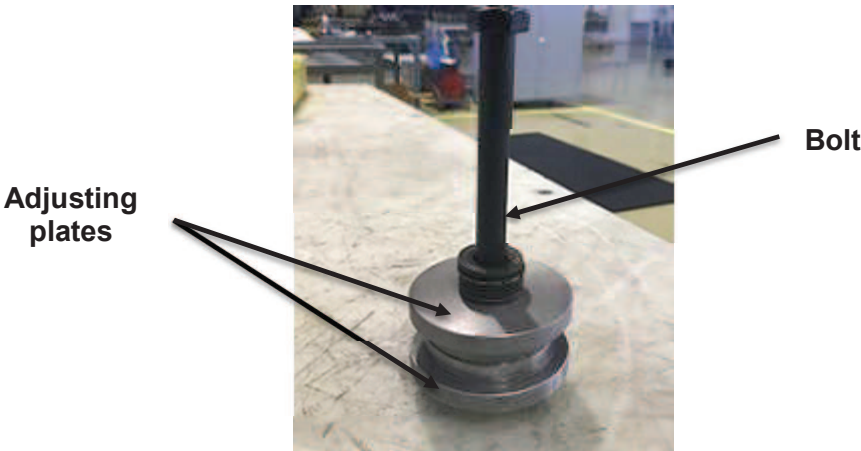

Borusan Makina Kazakhstan has developed the adjusting fixture for quick and convenient adjustment of 773 transfer gears.

Previously the unlocked gear might “walk” while it was being adjusted. The technician spent much time for this task. The repair time is especially critical when several transfer gears are awaiting the adjustment.

Due to this fixture, a technician retains the transfer gear from both sides and after that can adjust it easily.

2.0 Best Practice Description

The transfer gear adjusting fixture consists of 2 round adjusting plates and 1 bolt to fasten the adjusting plates on the gear from both sides. See Picture 1.

Picture 1. The 773 Transfer Gear Adjusting Fixture AS

3.0 Implementation Steps

The transfer gear adjusting fixture is in use

See below the 773D Transfer Gear adjustment with using the transfer gear fixture.

773D/E Transfer Gear Adjusting Fixture	DATE 8/20/2018	CHG NO 00	NUMBER 4.03-170504-01

4.0 Benefits

- Reduced time for transfer gear adjustment;
- Easy to use and keep these adjusting plates;
- Makes the gear adjustment easier.

5.0 Resources Required

- Metal for fabricating 2 x adjusting plates;
- Lathe work.

6.0 Supporting Attachments / References

The necessary drawings of the adjusting plates are attached.
