1.0 Introduction

Material, consumable and tool management strategy is critical to CRC operations. In order to achieve high and consistent productivity in a shop, the tools, materials and consumables must be handled in an efficient way. The effective management can be achieved by using ToolWatch software. ToolWatch Enterprise software is one of the most comprehensive systems available today for managing tools, equipment, materials and consumables more efficiently across the company.

The key success factors in CRC are to minimize unplanned failures of tools and equipment and efficient management of consumables and materials. Proper control and monitoring saves time, reduces lost and failures of the tools and equipment. When components are repaired or rebuilt at the dealer CRC, dealers must be able to assess the current inventory level of consumables and materials, condition of the equipment and tools. These assessments can be performed with ToolWatch, which can generate over one hundred reports such as: consumable usage report, material and consumable low level report, lost/broken tools report, calibration schedules, tools by employee and etc., instantly.

2.0 Best Practice Description

This Best Practice contains several standard reports from ToolWatch used in Borusan Makina Kazakhstan Company in order to achieve efficient control and monitoring of tools, equipment, materials and consumables.

Consumable usage report

ToolWatch generates a report which shows the quantity and the price of consumables and materials for the selected or all work order for a selected period. The report includes:

- Description of consumables/materials
- Price for consumables/materials
- Quantity of used consumables/materials
- Item number consumables/materials
- Work Order/location/employee (of consumed material)

A sample report is attached. This report was generated using ToolWatch software.

Tools by employee/location

This report generates a report with all tools of any selected employee or location.

Purchase order report

This report shows the purchase order that was created.

Consumable usage report by employee

This report shows the quantity and the price of consumables consumed by the selected employee for the selected work order

Service and Calibration schedule

This report, provides a schedule for service and calibration of tools and equipment.

Key Performance Indicators

The Key Performance Indicators pane (see images) shows financial information about tool and material values, where resources are concentrated and distributed, etc. It allows you to compare current data with data from other periods of time. KPI's are pre-set and not customizable. Charts and Graphs (see images) can chronicle data patterns over time and identify daily, monthly or seasonal trends that help you forecast for future needs. Samples of some KPI's and Graphs are attached below.

3.0 Implementation Steps

1. Determine level of dealer interest in using such management strategy and software
2. Purchase ToolWatch Enterprise software
3. Train Tool Keepers for using ToolWatch
4. Implement materials, consumables and tools into ToolWatch
5. Decide what kind of reports will be used
6. Efficient control and monitor the tools equipment, consumables and materials

4.0 Benefits

- Saving Time (Purchase Order, stock, used)
- Efficient Control and Monitoring of tools (Calibration, Service)
- Efficient Control and Monitoring of materials (in stock, used, low, target and high levels)
- Excellent tracking system (reduced loss, status control)
- Over 100 Reports can be generated instantly
- Maintains updated Tools and Materials Inventory
- Effective management of the inventory

5.0 Resources Required

Personnel time to create and manage report system and process.

6.0 Supporting Attachments / References

Dealers interested in using ToolWatch Enterprise software should contact:

Casi Portlock
 ToolWatch Corporation
 400 Inverness Pkwy, Ste. 450
 Englewood, CO 80112
 Direct: 720-210-1066
 Email: cportlock@toolwatch.com

Denise Shelton
 VP Professional Services
 ToolWatch
 303-799-3822 direct
dshelton@toolwatch.com

If dealers have questions in implementing ToolWatch in CRC, they should contact:

Nurgissa DUISEMBIYEV
 CRC Process Engineer
