DISCLAIMER: The information and potential benefits included in this document are based upon information provided by one or more Cat® dealers, and such dealer(s) opinion of “Best Practices.” Caterpillar makes no representation or warranty about the information contained in this document or the products referenced herein. Caterpillar welcomes additional “Best Practice” recommendations from our dealer network.

1.0 Introduction

In the world of high competition, to be different from your competitors and more attractive for your customers are key factors if you want to be successful and sustainable in the market.

Previously our PSSRs (Parts Sales and Service Representatives) provided their customers with the information of the CRC capabilities via presentations, brochures and face-to-face conversation. That way to describe and demonstrate the capabilities of our Component Rebuild Center (CRC) was too common and did not make that effect on customers we wanted.

Thus, the idea to shoot short videos about each service in the CRC came into mind. This project has received the name of the E-PSSR. This project hits two main targets.

- It gives a clear understanding of the CRC processes to customers, PSSRs, and newcomers in an interesting way
- It is a powerful marketing tool for PSSRs to sell the CRC service.

2.0 Best Practice Description

The E-PSSR is a man or woman who tells about the CRC rebuild capabilities with reasonable detail in a relaxed and interesting manner. The videos are short and last 3-4 minutes, i.e. all production cycles with technical aspects are shown in a fast rewind. 3D modelling was applied in the videos to make them more entertaining and easier to perceive.

When this project was under the stage of preparation. We paid special attention to the selection of the person who would be an E-PSSR. We made a customer survey and asked them, who they wanted to see in videos and who they would trust. The survey results have given us the following profile of the E-PSSR:

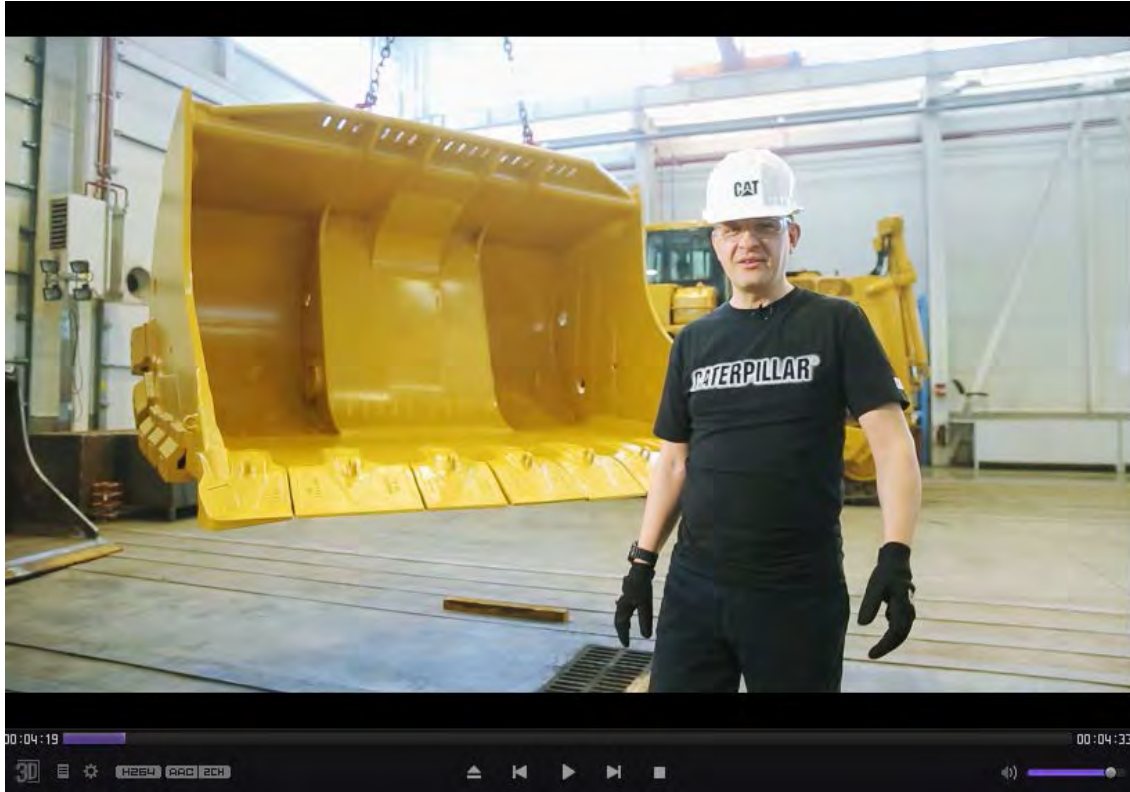

- A 40-year-old man, an engineering expert;
- A simple person with a simple language of statement;
- Someone who is watching him should feel that it is their man, and this man is on the same page with them.

The choice of the right person as the E-PSSR has become the key aspect for the success and benefits that we have got thanks to those videos.

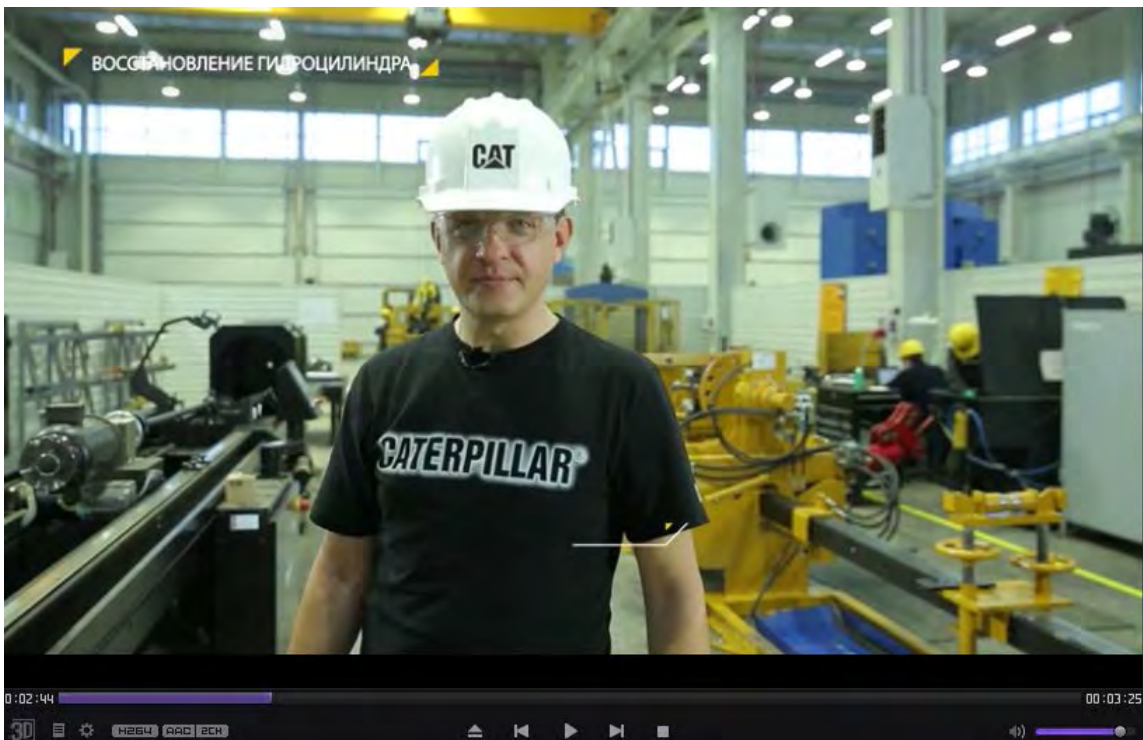

This project started in the beginning of 2015. We decided to start with the CRC new businesses. They were Hydraulic Cylinders and Bucket Rebuild. By now, we have shot the videos about hydraulic cylinders, buckets, CCR product. In the future, we are planning to make videos of the SOS Lab operation, turbochargers, hydraulic pumps and hydraulic motors. CAT asked us to provide the Bucket Rebuild Video with the English subtitles in order to show this video to other CAT Dealers.

All videos are available in YouTube Borusan Makina Channel. We also send direct e-mails to potential and active customers (our database consists of around 2,000 e-mail addresses). You can see E-PSSR video as an example: <https://www.youtube.com/watch?v=WhDcXxByqRk>

3.0 Implementation Steps

- Find a good camera man and the right person for the role of E-PSSR
- Select the rebuild process for video shooting
- Write the speech for the E-PSSR relating to the rebuild process
- Approve the budget for video shooting
- Shoot the rebuild process selected
- Share the ready short video in YouTube or any other channel of your company

4.0 Benefits

- Customers become more loyal to CRC products, because they can see with their own eyes how the processes are performed and what CRC capabilities are used within 3-4 minutes.
- Both powerful marketing and training tool for our PSSRs. Now they better understand the CRC capabilities and can show all advantages of the CRC rebuild processes to their customers.
- E-PSSR is a good “CRC Capabilities” presentation tool for CRC newcomers and guests.
- E-PSSR project has become the first among competitors who has shown rebuild processes as they are.

5.0 Resources Required

- Marketing Specialist, Operator with camera and a person who will be E-PSSR.
- Support of the technical personnel.
- Investments to shoot short videos for E-PSSR.
