Caterpillar makes no representation or warranty about the information contained in this document or the products referenced herein. Caterpillar welcomes additional “Best Practice” recommendations from our dealer network.

1.0 Introduction

Accurate, up-to-date parts lists within Dealers' BUILDER files are crucial in developing and maintaining MARCs, Standard Jobs, and PM Checklists.

Currently, there is no automated process within the BUILDER software to update the BUILDER parts lists with 'Cancelled - Replaced By' (CRB) parts. A tool in the form of an Excel macro was developed by the MPSD Equipment Management Services group that automatically replaces and/or identifies the CRB parts in BUILDER from DBS or DBSi.

There are three different scenarios in which CRB parts are addressed:

- 1) When one part is cancelled and replaced by one part ('one-for-one'),
- 2) When many parts are replaced by one part ('many-for-one'), or
- 3) When one part is replaced with many parts ('one-for-many').

This tool automatically replaces the CRB parts in a 'one-for-one' or a 'many-for-one' scenario in the selected BUILDER database. It creates a grief report to address each 'one-for-many' scenario. In this situation, the macro will automatically add the new parts (the 'for-many' parts) to the Master Parts Table in BUILDER, but the user will have to manually add the 'for-many' parts in each applicable job parts list and delete the cancelled part. Before replacing the part numbers in BUILDER, the spreadsheet has an option to view the dealer on-hand quantities of the cancelled parts.

2.0 Best Practice Description

To Set-Up Client Access ODBC:

1. Click Windows 'Start' button.
2. Click 'Settings'.
3. Click 'Control Panel'.
4. Click 'Administrative Tools'.
5. Click 'Data Sources (ODBC)'.
6. On the 'User DSN' tab, click the 'Add' button.
7. Select 'Client Access ODBC' driver and click 'Finish' (Note: If the Client Access ODBC driver is missing, it can be loaded from the dealer's CD labeled "AS400 Client Access Family for Windows" or install Client Access Express).
8. Type in a Data Source Name (i.e. CATS6R).
9. Enter your AS/400 System Name (i.e. CATS6R.SC.CAT.COM).
10. Click 'OK' to save connection.

To perform the update:

1. Copy the spreadsheet into the folder where the BUILDER database is stored.
Note: see attachment in Section 6.0 in this document to download the spreadsheet.
2. Enter the ODBC name that points to the AS/400.
3. Enter the data library that contains the PIC Store (PCPPIST0) file, which contains store on-hand

quantities.

4. Enter the LIBCOM library that contains the Replacing Part (PCPPRRP0) file.
5. Enter the name of the BUILDER database that you want to update (include the .mdb suffix).
6. Enter 'Y' to grief all parts that have on-hand quantities. These parts will **not** be automatically replaced. Enter 'N' to automatically replace these parts. (It is recommended to first enter 'Y' and save the report. Then enter 'N' and re-run to automatically replace parts).
7. Save your changes to the spreadsheet.
8. Click the 'Update BUILDER Parts' button. The process will run and generate a worksheet with a summary of the automatically replaced parts, as well as a grief report.

*** To re-run this process, click on the 'Replace Part Input' worksheet and re-run. ***

Recommendations:

1. Import current parts pricing after performing 'Engineering Design Change Part Update'. (The newly added parts will have a price of zero.)
2. Print the worksheet of the part numbers on hand quantities to determine stock disposition.
3. Print the worksheet to help manually reconcile the 'one-for-many' parts. In BUILDER, select 'Tables > Parts'. For each 'BUILDER Parts with Grief', select 'Where Used'. This will generate a list of repair options in which the user needs to manually add the 'Replacing Parts' in each job parts list and delete each 'BUILDER Parts with Grief'.

3.0 Implementation Steps

To obtain a subscription of BUILDER 1.8.1 software, contact:

Caterpillar Media Logistics Subscriptions
 1-800-566-7782 (U.S. and Canada) or (309) 266-0942
 Fax: (309) 266-4647
 Media_logistics@cat.com

Software	Media Number	Price
Repair Option BUILDER License	JERC4920	\$3,250
BUILDER Yearly Subscription	JERC4921	\$1,450
BUILDER Additional Copy	JERC4923	\$40 license/\$100 Yearly sub.

or

CSA PC Bundle Yearly Subscription (includes BUILDER, Calculator, CSA QUOTER, CSA Scheduler, Site Operations & Maintenance Advisor, Maintenance Control System Suite) Bundle has no license fee.	JERC5000	\$3,550

4.0 Benefits

Dealers can quickly and easily update their own localized CGM BUILDER files periodically in order to develop and maintain MARCs, Standard Jobs, and PM Checklists.

5.0 Resources Required

- BUILDER Software
- Microsoft Excel
- AS400 Client Access Family for Windows or Client Access Express
- DBS or DBSi
