1.0 Introduction

It is difficult to manually transport the lower roller collars of the 7495 HD and HR excavators as their design is not favorable for packaging and transporting by the mechanics.

Figure 1: Roller collars accessory tool

2.0 Best Practice Description

The Best practice developed is a device to assist in handling the 7495 undercarriage lower roller retaining collars. With commonly available parts and little labor. Implementation of Best Practices can be easily done during maintenance to minimize bad posture.

4.0 Benefits

- Safety: Risks related to accidents and injury due to ergonomics when carrying out the manual transport of the component have been reduced.
- Productivity: Time and effort to move is reduced.

5.0 Resources Required

Manpower: 16 Hours
